

Community Health Status Indicators

CHSI 2009

Our Mission: Provide Information for Improving Community Health

Relative Health Importance: Hillsdale County, MI

 Indicates a status favorable to peer county median value

 Indicates that a closer look and perhaps reduction to the percent or rate may be needed. Blank indicates no comparison.

Your Health Status Compared to Peers		
	UNFAVORABLE	FAVORABLE
UNFAVORABLE	<div></div> <ul style="list-style-type: none">Breast Cancer (Female)Colon CancerCoronary Heart DiseaseMotor Vehicle Injuries	<ul style="list-style-type: none">No Care in First TrimesterLung CancerStrokeSuicide
FAVORABLE	<ul style="list-style-type: none">Births to Women age 40-54	<div></div> <ul style="list-style-type: none">Low Birth Wt. (<2500 g)Very Low Birth Wt. (<1500 g)Premature Births (<37 weeks)Births to Women under 18

The Relative Health Importance table creates four categories of relative concern by simply comparing a county to its peers and to the U.S.

A county's indicators in the Unfavorable/Unfavorable Quadrant (🔍) are higher than the U.S. and its peers and may warrant more attention. Conversely, indicators in the Favorable/Favorable Quadrant (🍏) of the table compare favorably to both peers and the U.S. The other boxes represent intermediate levels of health where a county's rate is higher than either its peers or the U.S., but not both.
